# How does B8 Plus work ?

# Primary Application Scenarios

## MAINTAIN SAFE SOCIAL DISTANCING

- ① All employees should be equipped with wristbands for safety while working in company during the pandemic.
- ② When two employees with wristbands are accidentally getting close within 2 meters.
- ③ The wristbands will vibrate to remind the wearer to maintain safe social distance.
- ④ Thus helping economy to get recovered while keeping employees safe and healthy.

## TRACING CLOSE CONTACTS

- ① When two employees with wristbands are accidentally getting close within 2 meters.
- ② The wristbands of both sides will automatically record the data of close contact, including who, when and how long.
- ③ 20,000 close contact records guarantee the infection can be timely detected at the early stage to prevent and control as soon as possible.

# Primary Application Scenarios

## REAL-TIME TEMPERATURE MONITORING

- ① When the body temperature of the wearer is beyond the normal range,
- ② The abnormal temperature will be detected by the sensor in the wristband
- ③ The wristband will remind the wearer to see a doctor as early as possible to recover.
